NISSAN INTELLIGENT MOBILITY

NISSAN ENERGY SOLAR

Transforming the way we live

WHY SOLAR?

Solar power is now the fastest growing source of energy. After 50 years of development, solar panels are more efficient than ever, and have a lifespan of up to 40 years.

WHY ENERGY STORAGE?

It allows you to get the most out of your solar panels and puts you in complete control of your energy needs. By storing the solar power produced, it enables you to use it as and when you need, even when the sun's not shining.

1

- /Three types of solar panels (275Wp - 320Wp)
- /Building-integrated and building-applied options
- /25 years warranty

2

- /All-in-one system
- /New battery and second life Nissan EV battery options
- /Up to 10 years warranty

Control your energy needs with the Home Energy Management system in a simple click

WHY SOLAR PANELS AND ENERGY STORAGE

TOGETHER?

Renewable
energy
generation

Storage
excess power
from your solar
panels

Charge
during the day
to supply
electricity in the night

Maximises
your
electricity
savings

Makes you
less reliant
on the grid
